

OUR ALUMINIUM VALUE PROPOSITION

When you choose BlueScope Distribution we will aim to provide you with quality aluminium products and exceptional customer service. Our Aluminium Value Proposition is based on the following key product and service offerings:

QUALITY ASSURANCE

Quality Accredited Products

We help reduce compliance risk through our ISO 9001 quality management system accreditation – providing assurance for our business. All our Aluminium products comply with Australian standards in accordance with AS/NZS 1866:1997 and AS/NZS 1734:1997. This removes the hassle and ensures your material complies to the necessary standards to ensure your products are fit for purpose.

MULTIPLE PRECISION PROCESSING

Processed Products And Parts

We work with our customers to provide confidence in our processed products and parts. This in turn has allowed some customers to free up warehouse space and utilise their workforce in adding value down the line. Ranging from shearing, slitting and re-coiling to complex and precise router cutting, your material will be delivered marked and safely packed as specified. We also aim for on time delivery to suit your project schedule.

STOCK MANAGEMENT PROGRAMS

Supply Chain Management

Managing multiple jobs and projects can be complex, as well as time and resource consuming, requiring specific skill-sets and experience. BlueScope Distribution provides expertise in stock management, supply chain efficiency and inventory optimisation programs. This can help your business to reduce working capital with the peace of mind of stock availability.

LOCAL SUPPORT

Leverage Brand Awareness

We aim to partner with our customers to ensure a long-lasting relationship built on trust. Leveraging our brands, BlueScope Distribution aims to further support our customers' business. We work with our customers to help further promote their products and services into new and existing segments.
