# National Product, Processing & Solutions Hub

The National Product, Processing & Solutions Hub is BlueScope Distribution's new capability. It enables us to provide our customers with a unique domestically co-ordinated supply chain solution for the delivery of large scale projects.

Our Product, Processing and Solutions Hub is specially designed to service **national projects** in the defence, infrastructure, renewables, mining, transport and agricultural space.

It is strategically located in Unanderra, NSW providing **world-class plate processing capability**, an optimised supply chain solution with diversified transport options, and it has its own dedicated **project management team**. BlueScope Distribution's Product Processing and Solutions Hub provides **supply chain certainty** to help our customers deliver significant projects in Australia.

Through our highly experienced project management team, BlueScope Distribution's National Product, Processing and Solutions Hub offers customers:

- The ease of dealing with one single-source provider for product, processing and service solutions.
- Industry expertise, technical know-how, and local product and processing knowledge backed by the BlueScope mill to help deliver steel intensive projects on time and to specification.
- Centralised project management services to help co-ordinate the complex supply chain typically associated with large steel intensive products.
- Surge capability & capacity to deliver per project timelines.
- End-to-end supply chain solutions providing surety of supply nationally.
- Secure onshore supply of quality steel and aluminium, processed to project requirements.
- Strategically located, in close proximity to the BlueScope mill and other strategic partners providing an optimised and highly efficient supply chain solution.

# Our national capability helps customers deliver significant projects Australia wide

BlueScope Distribution's National Product, Processing & Solutions Hub delivers centrally managed plate processing and project management services to customers supporting the defence, infrastructure, renewable energy, transport, mining and agricultural industries.

## Defence

Critical to defence projects and our customers serving this industry is national access to quality steel and aluminium products, including quench and tempered steel plate. These products meet applicable standards for Australian conditions. TheHub provides a total project management solution, offering product, processing and project management services to ensure projects are delivered on time and to specification.

## Infrastructure

Successful civil construction companies need access to a wide range of products and processing services to meet project needs. TheHub provides steel intensive infrastructure projects continuity of supply and certification and project management alignment with customers servicing Australia's infrastructure industry.

## Renewable Energy

We work with Australian customers delivering renewables projects across Australia – wind, solar & hydro. Our complete range of steel and aluminium, diversified processing capability and end to end supply chain and project management services enable us to ensure projects are delivered per the project specified timelines.

## Transport

TheHub's processing capability enables us to provide semi-finished steel and aluminium componentry for ease of fabrication and assembly by our transport customers. A comprehensive range of products are manufactured to meet transport manufacturing requirements, supplied by BlueScope Distribution Australia wide.

## Mining, Oil & Gas

Our Mining, Oil and Gas customers often face challenges with remote project locations, as well as sourcing reliable supply of quality product, associated processing and timely supply. We work hard to provide customers a streamlined steel and aluminium supply chain solutions to ensure projects are delivered on time, to specification and within budget.

## Agriculture

Our customers servicing the agricultural segment with on-farm production equipment, manufacturing and storage products require steel supplied and processed to project specification, often delivered to regional locations. TheHub enables our customers servicing the agricultural sector to access semi-finished steel components that are ready for local assembly & installation.

# Partnering for Project Success

Delivering significant projects can be a complex activity. BlueScope Distribution has invested in a new capability to help our customers deliver significant projects on time, to specification and with ease.

## Project Management

A dedicated project management team works with customers to ensure projects are delivered on time and to specification. This includes a complete end to end supply chain management solution.

## A national network

The National Product, Processing and Solutions Hub is a part of BlueScope Distribution's national network. Collectively our teams provide customers with steel and aluminium products, processing and solutions. The Unanderra site offers a national capability to deliver significant projects whilst our state based sites work with local customers to deliver on their project needs.

## Single source supplier

Your convenient single-source supplier and processor of everything from BlueScope's massive range of premium products, plus custom grades and Aluminium from our carefully selected partner brands.

## Partnering

Combining technical knowledge, in-depth project management and material processing and logistics, we improve project efficiency through inventory and cashflow management.

## Quality

We provide quality products that are compliant with the relevant Australian testing and compliance standards.

## Our heritage

Proudly Australian, BlueScope Distribution is part of BlueScope's broader group of businesses. As one of Australia's largest steel and aluminium distributors, our team supports customers to deliver large scale projects Australia wide.

## Processing Capability

The National Product, Processing & Solutions Hub provides customers with state of the art steel processing capability including:

- Straight plasma cutting
- Constant angle bevel
- Complex variable bevel & K bevel
- Power hole thermal cut
- Drilling
- Tapping
- Etching
- Laser or inkjet printing
- Blast and prime available on request

Tolerances are customised beyond DIN ISO 2768 - MK & ISO 9013\_2017.

The National Products, Processing & Solutions Hub utilises a state of the art, MicroStep multi-functional processing line to deliver both Plasma and Oxyfuel cutting capability.

This allows us to provide unique, optimal solutions across a range of thicknesses up to 150mm while maintaining cut tolerances to meet or exceed ISO9013 standards. Our market leading integrated laser scanning and auto-calibration capability allows for this to be achieved while maximising yield performance for our Customers.

In addition to thermal cutting, we have an operational capability to deliver on a range of high-end products solutions, including complex variable bevels, drilling and tapping capabilities rounded off with a variety of marking functionalities including etching, laser and inkjet marking. For more information about our full range of steel processing capabilities please speak to your account manager.

## Knowhow

Our highly skilled team provides in-depth product experience, processing knowhow and project management expertise to ensure project requirements are met and projects are delivered on time and to specification.

## Supply chain certainty

We provide customers with surge capability required for the successful delivery of large scale projects. Our project management team works with customers to help deliver projects safely, to specification, on-time and in full.

## Agility

Dedicated to providing agile solutions, our project management team provides a highly responsive service, professional advice and problem solving to help support our customers to deliver on their project requirements.

## Strategically located

The National Product, Processing and Solutions Hub is strategically located in Unanderra, NSW. It enables us to capitalise on its close proximity to the BlueScope mill and other local supply partners to provide customers with a highly efficient and streamlined supply chain. The facility offers sea, road, rail and air freight solutions to support project requirements Australia-wide.

## Comprehensive product range

With robust onshore stock holdings, we offer a diverse product range including: XLERPLATE® steel, TRU-SPEC® steel, BISALLOY® steel and welded beams and columns. Coupled with a comprehensive range of aluminium products and other custom grades, sourced locally and overseas, this enables us to offer a single source product, processing and solutions offering.

**Xlerplate®**

**TruSpec®**

**Redcor**

**Bisalloy**

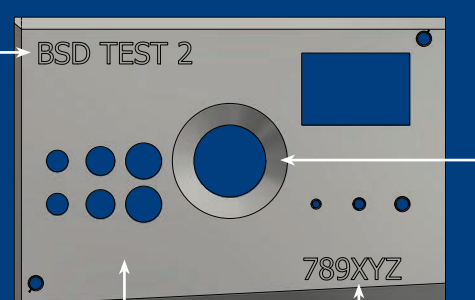

### Etching

For product identification or weld attachment outlines

### Power hole thermal cut

Minimises dint/ding defects – clean cut

**Blast and prime**  
Available on request

**Laser or inkjet printing**  
For product identification

# We are BlueScope Distribution

We are BlueScope Distribution, a market leading **steel and aluminium distributor and solutions provider**. With a **national network of branches across metro locations and major regional towns**, we are committed to supplying our customers with **quality products, associated processing and project management solutions**. Our customers experience the ease of dealing with a **single-source supplier** and the efficiency of doing business with **one point of contact**, providing the understanding and knowhow that saves time and money.

BlueScope Distribution services a wide range of customers across a large number of industries across Australia and we deliver a diversified range of products, processing and solutions. Our service offer enables our customers to **find the freedom to do what they do best**. Proudly Australian, our strength is in our name.

The **National Product Processing and Solutions Hub** is a specialised capability of BlueScope Distribution which delivers world-class plate processing and solutions to customers servicing key industries across Australia. Our highly experienced team offers technical expertise and comprehensive **national project management capability** to help our customers deliver projects on time and to specification.
